

**BLUWAT**

## Polyacrylamide / Polyelectrolyte / Flocculant

### Application Fields:

- As flocculants for wastewater from different industries
- Thickening agent for textile printing and coating
- Coal washing and sedimentation
- Wet strengthening agent, resident agent for paper making
- Sludge dewatering
- Drilling mud additive for oilfield
- For sugar refining
- Shale stabilization
- Solid Stabilizer
- Mining (coal, gold, diamonds etc.)
- Paper-making
- Coal washing

Item:	Anionic	Cationic	Non-ionic
Appearance	Off-White Granular Powder		
Molecular Weight:	8-22 Million	8-12 Million	8-12 Million
Charge Degree	10-50%	10-60%	<5%
Solid content:	>89%		
Recommended Working Concentration:	0.1-0.5%
